

HADIL HORCHANI

Data Science & AI Master's Student | Bachelor's in Software Engineering | PFE Candidate

Gafsa, Tunisia · +216 29 284 939 · hadilhorchani23@gmail.com

hadilhorchani.github.io/hadil-portfolio · linkedin.com/in/hadil-horchani-981b83317 · github.com/hadilhorchani

PROFILE

Data Science Master's student with a Bachelor's degree in Software Engineering and a solid foundation in Python, machine learning, neural networks, NLP and computer vision. Experience building AI-powered web applications (STEG internship) and personal projects (neural network from scratch, RAG, face recognition). Seeking a PFE internship in Data Science, Machine Learning or Artificial Intelligence in Sfax or Gafsa.

TECHNICAL SKILLS

Programming : Python, SQL, Java, JavaScript

AI / Machine Learning : Machine Learning, Deep Learning, Neural Networks, NLP, Computer Vision, RAG, Classification

Data Science : Data Analysis & Preprocessing, EDA, Feature Engineering, Statistics, Model Evaluation, Data Visualization, Web Scraping

Libraries & Frameworks : TensorFlow, NumPy, NLTK, DeepFace (ArcFace, RetinaFace), Scrapy, Django, Flask

Databases : MySQL, MongoDB

Project Mgmt & Tools : Agile/Scrum, Trello, Git/GitHub, Google Colab, VS Code

Other : Cybersecurity & IoT fundamentals, HTML, CSS

PROJECTS

NeuroBoundary — Neural Network from Scratch 2026 · [GitHub](#)

- Implemented a neural network in NumPy and animated its decision boundary across training epochs (moons/spirals); reached 91% test accuracy on moons.

RAG from Scratch — Retrieval-Augmented Generation 2024 · [GitHub](#)

- Built a Retrieval-Augmented Generation pipeline from scratch to answer questions over documents.

Work-Management Web App with AI Chatbot — STEG 2025

- Django web application with an integrated NLP chatbot for managing tasks, quotations and internal projects.

FaceID Lab — Face Recognition 2026

- Experiment with DeepFace, ArcFace and RetinaFace (embeddings, cosine similarity) and threshold-based evaluation (MATCH / UNKNOWN).

Tunisia Mental Health Tracker 2024 · [GitHub](#)

- Python project for mental-health tracking in the Tunisian context.

Other Projects : Web scraping with Scrapy · Zodiac Predictor · AI Chatbot, NLP (2022) · IoT motion-sensing mini robot (IoT Club)

EXPERIENCE

STEG — AI & Web Application Development Intern Feb 2025 – May 2025 | Gafsa

- Developed a Django web application to digitize quotation and project management, with an integrated AI chatbot (Python, NLP, text classification).
- Implemented database-backed task-management workflows in collaboration with project stakeholders.

FSG Faculty Club — AI & Deep Learning Instructor (Volunteer) Oct 2025 – Present | Gabès

- Led hands-on workshops on AI and Deep Learning with Python; supported peers and contributed to AI-awareness initiatives.

EDUCATION

Master's in Data Science — ISSAT Gafsa 2025 – Present

- Data analysis & visualization, machine learning, statistical methods, Python for data science.

Bachelor's in Software Engineering — Faculty of Sciences of Gabès 2022 – 2025

- Software development, AI & machine learning, web development, databases, Agile/Scrum and Trello, cybersecurity and IoT fundamentals.

SOFT SKILLS

Communication · Storytelling · Leadership · Teamwork & Collaboration · Critical Thinking · Problem Solving · Adaptability · Time Management · Project Management

CERTIFICATIONS & LANGUAGES

Certifications : Kaggle: Computer Vision, Deep Learning

Languages : Arabic (native) · French (C2) · English (C2) · Italian (B2) · German (B2)
