Other Info

Skills

Hard skills:

Web Development: HTML, CSS, JavaScript, Django, Flask

AI & Machine Learning: Python, TensorFlow, NLP, AI Chatbots

Databases: MongoDB, SQL

Design and editing

Soft Skills:

Storytelling & Authorship

Adaptability

Problem Solving

Visual Arts & Design

Problem-solving & Critical thinking

Teamwork & Collaboration

Creativity & Initiative

Communication & Leaders

About Me

As a Software Engineer AI and Data Science Master's student, I believe that data is most powerful when it serves a human purpose. I am an author and artist at heart, driven by a deep sense of empathy and a desire to use AI and web development to foster social inclusion. Fluent in six languages and seasoned in multicultural collaboration, I don't just build tools—I build bridges. I am seeking to apply my technical precision and creative storytelling to a project where technology meets solidarity.

Experience

15 February 2025 - 15 May 2025

Tunisian Electricity and Gas Company:STEG | Intern -AI & Web Application Development

Developed a web application with an AI chatbot to manage internal work processes.

Designed and implemented task management features to streamline workflow.

Used AI tools to enhance user interaction and automate responses.

Collaborated with team members to improve digital workflow efficiency.

Gained hands-on experience in web development, AI integration, and project management.

20 October 2025 -

Faculté Des Science De Gabes | Volunteer- AI & Deep Learning Instructor, FSG Faculty Club

Taught AI concepts and Deep Learning fundamentals to students.

Organized interactive workshops and sessions to help peers understand complex topics.

Encouraged hands-on learning using Python and relevant AI tools.

Contributed to promoting digital skills and AI awareness within the student community.

Education

2022 - 2025

Faculté des Sciences de Gabès (FSG) — Gabès, Tunisia | Software Engineer

Software development (Python, Java, JavaScript)

Web development (HTML, CSS, JavaScript)

Artificial Intelligence & Machine Learning

Databases and information systems

Computer networks & cybersecurity fundamentals

Certifications

Certification in Computer Vision (kaggle)
Certification in Deep learning (kaggle)

Languages

Arabic: Native

French: Fluent C2

English: Advanced and professional C2

Italian: Fluent B2

German: Fluent B2

Interest

AI & Technology Innovation

Human Psychology & Emotional Intelligence

Creative Writing & Storytelling

Community Volunteering & Education

Web & App Development

Art

Others

Instagram: @2_h_a_d_i_1_2

2025 - present

L'Institut Supérieur des Sciences Appliquées & Technologie | Master In Data Science

Data analysis and visualization

Machine learning fundamentals

Statistical methods

Python for data science

Applied data-driven problem solving

15 February 2025 - 15 may 2025

Projects

Steg | Web App with AI Chatbot – STEG Internship Project

Developed a web application featuring an AI-powered chatbot to streamline workflow and automate task management.

Technologies: Python, Django, JavaScript, AI/ML libraries.

Impact: Enabled automated task responses, improved team efficiency, and enhanced overall work organization.

16 November 2022 - 10 December 2022

Independent | AI Chatbot Project

Developed an AI-powered chatbot capable of understanding user queries and providing intelligent responses.

Technologies: Python, NLP libraries (e.g., NLTK, TensorFlow), and chatbot frameworks.

Impact: Enhanced user interaction, automated responses, and demonstrated proficiency in AI, machine learning, and natural language processing.

2026 - present

Independent | Author – Book on Human Emotions (Self-initiated)

Researched and wrote a book exploring human emotions, emotional intelligence, and personal growth and how to connect it to AI and neural network.

Developed analytical and creative writing skills to present complex ideas in an engaging way.

Demonstrated initiative, discipline, and ability to complete a large-scale project independently.
